VINIT RAJORA

Roll No – 23/SE/172 vinit_23se172@dtu.ac.in | LeetCode | GitHub **+91 9953295898**

EDUCATION

Degree	Year	Institute	CGPA/%
B.Tech (Software Engineering)	2023 – 2027	Delhi Technological University (DTU)	8.147/ 10
CBSE (Class XII)	2021	Government Sarvodaya Bal Vidyalaya	84.8%
CBSE (Class X)	2019	Government Sarvodaya Bal Vidyalaya	80%

INTERNSHIP

ASSOCIATE SOFTWARE ENGINEERING TRAINEE – MARKUPX BRANDS TECHNOLOGIES PVT. LTD. *[25 May 2026 – 17 July 202*

- Completed a Work From Home internship as an Associate Software Engineering Trainee, supporting the team with software development, research, reporting, and documentation.
- Coordinated with the team on assigned tasks, working independently and delivering responsibilities with attention to detail.

PROJECTS

- **ShopEase – AI-Powered Smart Inventory & Billing Management System** **Live**
  – Developed a full-stack healthcare inventory and billing management system using the MERN stack with secure authentication and role-based access.
  – Implemented inventory tracking, POS billing, appointment management, expiry alerts, analytics dashboard, and REST APIs.
  – Designed an AI-powered expiry management system that identifies near-expiry products and sends location-based promotional notifications to reduce inventory waste.
  – **Tools and Technologies:** React.js, Node.js, Express.js, MongoDB, REST APIs, MERN Stack

- **Medical AI Chatbot using RAG** **GitHub**
  – Developed a Retrieval-Augmented Generation (RAG) based Medical AI Chatbot using Google Gemini, LlamaIndex, and Sentence Transformers for answering healthcare-related queries.
  – Built an end-to-end semantic retrieval pipeline with PDF parsing, embeddings, vector indexing, and context-aware response generation.
  – Built an interactive Gradio application for AI-powered medical document question answering.
  – **Tools and Technologies:** Python, Google Gemini, LlamaIndex, Sentence Transformers, Gradio, RAG

TECHNICAL SKILLS

- **Programming Languages:** C++, Python, JavaScript (ES6+)
- **Core Concepts:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems
- **Front-End Frameworks & Libraries:** React.js, HTML, CSS, Tailwind CSS, Framer Motion, GSAP
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, MySQL, Firebase
- **AI/ML & Deep Learning:** Scikit-learn, Natural Language Processing (NLP), Large Language Models (LLMs), Generative AI, Retrieval-Augmented Generation (RAG), LangChain, Hugging Face APIs
- **Tools:** Git, GitHub, Visual Studio Code

COURSES

- **Key Courses Taken:**
  - **Computer Science:** Machine Learning, **Data Structures and Algorithms**, Advanced Programming (OOPs), Operating Systems, Computer Networks, Database Management System
  - **Mathematics:** Probability Theory and Random Processes, Discrete Mathematics, Linear Algebra

EXTRA CURRICULAR ACTIVITIES AND ACHIEVEMENTS

- **Hackathons:** Participated in various hackathons including **HackDTU 2024** and **Vihaan 8.0 (2025)**, collaborating on innovative software and AI-based solutions.
- **LeetCode:** Actively solving Data Structures and Algorithms problems to strengthen problem-solving skills.
